

CLAR 4 – Interventions, Ethical Issues, Analysis Plan

Deadline: Summative PRB presentation.

Methods: Intervention

1. Based on your knowledge of the current evidence, local context, care processes, and patient population – Describe a possible intervention(s) that could improve care for your patient population

See developmental journey matrix for clarifying questions. You may cite work done previously that has been uploaded to ALP – there is no need to copy and paste work that has already been done. As possible, you may use the class project for ECS124 here.

2. What is the theory behind the chosen intervention components? Why should this intervention work or improve patient care?
3. How will you implement and execute your planned intervention(s)?
4. What lessons did you learn or challenges that were encountered in developing your intervention?
5. What are your future plans?

Methods: Ethical Issues

1. Was the proposed intervention submitted to the CPHS for review or quality improvement exemption? Please include copies of correspondence with the CPHS here.
See developmental journey matrix for clarifying questions.
2. Describe how you will keep patient data confidential.
3. Describe if there is any potential risk to patients from your planned intervention and how you have considered for any possible unintended consequences.

Methods: Analysis of Data

1. Describe your methods (observational, quasi-experimental, experimental) that will be used to measure the impact of the intervention on the patient population.

See developmental journey matrix for clarifying questions. You may cite work done previously that has been uploaded to ALP – there is no need to copy and paste work that has already been done. As possible, you may use the class project for ECS126 here.

2. How will assess the exposure of your intervention on your intended patient population? How will you know whether your intervention changed the care for the patient population?
3. What lessons did you learn or describe the challenges that were encountered in developing your analysis plan?
4. What are your future plans?

Please answer the questions below. You may use this template and may upload additional materials into your portfolio as needed, referring to them in this document. Please note that many of the questions below may be answered by your formative and summative proposals – you can simply refer to those if appropriate.

6. Based on your knowledge of the current evidence, local context, care processes, and patient population – Describe a possible intervention(s) that could improve care for your patient population. You may refer to your work in ECS 124.
7. What is the theory behind the chosen intervention components? Why/how will this intervention work to improve patient care?
8. How will you implement and execute your planned intervention(s)?
9. What lessons did you learn or challenges that were encountered in developing your intervention?
10. What are your future plans?

Ethical Issues

4. Was the proposed intervention submitted to the CPHS for review or quality improvement exemption? Please upload any relevant documents to CLAR 4 in the portfolio
5. Describe how you will keep patient data confidential.

6. Describe if there is any potential risk to patients from your planned intervention and how you have considered for any possible unintended consequences.

Analysis of Data

5. Describe your methods (observational, quasi-experimental, experimental) that will be used to measure the impact of the intervention on the patient population. Your work in ECS 126 may be relevant here.
6. How will assess the exposure of your intervention on your intended patient population? How will you know whether your intervention changed the care for the patient population?

How have you shared this information with the microsystem(s)? Please upload any presentation materials as separate work products.

Reflect on the effect of your PRB experience (summative presentation) on your planning. What else has been helpful to you in designing your practicum?

What lessons did you learn from CLAR 4, including insights, challenges, and surprises?

What are your plans for CLAR 5?
